

Fleas

In the market for Fleas?

Hopefully not as fleas can be a burden for both your pet and yourself in trying to get rid of them. So how do we prevent them? Let's learn the life cycle first:

So what do we do?

As with most things, **prevention** is the best medicine.

In managing fleas, we ideally need to target **ALL STAGES** of a flea's life cycle.

ALL IN CONTACT PETS and ENVIRONMENT NEED TO BE DECONTAMINATED.

There are a number of products to prevent fleas from happening in the first place which target some, if not all stages of the flea's life cycle.

A few examples:

- Frontline – paralyses the **ADULT** fleas to prevent them from reproducing.
- Revolution – kills all stages of fleas; also prevents heartworm and intestinal roundworms
- Advantage – paralysis **ADULT** fleas, prevents fleas from biting.
- Sentinel – interferes with chitin production not allowing flea to slough.
- Panoramis/Comfortis – paralyses adult fleas and larvae
- Nexguard – kills adult fleas after blood meal
- Bravecto – Paralyses fleas
